July 2010

To: Branch e-mail contacts

Please find attached details of the October 2010 Autumn Training Day. As in previous years, the course will be based at Wotton-under-Edge and be using towers in the surrounding area. Could you please ensure that all the towers in your Branch receive this information? Also, please inform any unattached members who may be interested in the course.

We are keen to encourage ringers to progress beyond the basic six bell methods offered in the March course and we hope that the courses offered in October will provide stepping stones on the way. We have based our choice of courses on previous years' experience and student feedback, but also we have tried to offer something slightly different. As always, feedback on what is wanted is helpful: we can judge the success of what is on offer from the numbers that enrol, but we cannot readily tell what alternatives might be better.

Please note that enrolment forms should be returned as soon as possible and in any case, no later than Monday 13th September. This deadline is one week earlier than previous years.

Thank you for your help.

Chris & Gill Greef
